EDUCATION

GYAN GANGA INSTITUTE OF TECHNOLOGY AND SCIENCES, RGPV UNIVERSITY

Jabalpur, India

Bachelor of Technology in Computer Science

Specialization: Artificial Intelligence & Machine Learning

Graduated: July 2028

Cumulative CGPA: 7.4/10;

Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Development, Machine Learning

PROFESSIONAL SUMMARY

I am a proficient and passionate software developer with a focus on innovative solutions in technology. With extensive experience in various programming languages and frameworks, I excel at developing web applications and APIs. I contribute to **open-source communities**, working on projects that encourage global collaboration and skill enhancement. I aim for continuous growth, combining creativity with technical excellence to build reliable & friendly, user - centered products that make a real difference.

WORK EXPERIENCE

Open-Source Contributor– GirlScript Summer of Code 2025 (GSSoC)

Jul 2025 – Sep 2025

- Contributed to multiple open-source projects with focus on bug fixes, feature development, and documentation
- Collaborated with global developers and mentors using Git workflows and agile methodologies

Team Lead – Team ILM Tech

Sep 2025 – Present

- Leading technical team in developing AI/ML projects and coordinating cross-functional collaboration
 - Managing project timelines, resource allocate, and mentoring team members on best practiceszz
- Campus Ambassador** for Techfest IIT Bombay, Mood Indigo, IIT Kharagpur - Kshitij 2026, TechXNinjas (ParanoX 2.0 Hackathon 2025) - facilitated events for 1,000+ students.

Google Cloud Arcade Facilitator – Season 1 (First Cohort)

May – July 2025

Completed **3 major milestones**, achieving the **Arcade Trooper Tier** by mastering advanced Google Cloud labs and challenge. Gained hands-on experience with AI/ML workflows, Cloud Run, Cloud Functions, Kubernetes (GKE), and cloud infrastructure optimization.

Strength practical skills in cloud deployment, serverless architectures, and automated scaling environments.

UNIVERSITY PROJECTS

Space HabitatX

Tech Stack: React.js, Node.js, Python, Machine Learning, APIs, GIS datasets, Web Dashboard

Oct 2025

A space-innovation project designed for sustainable human survival in extraterrestrial environments, submitted to NASA Space Apps 2025.

Features:

Habitat simulation, environment monitoring model, survival analytics, resource optimization

Daily RoutineX

Tech Stack: Python, Flask/Node.js, MySQL, HTML/CSS/JS, AI/ML modules

May 2025

A productivity-focused AI-assisted daily routine optimizer that helps users plan tasks, track habits, and maintain consistency.

Features:

Smart task scheduling, habit tracking, reminders, analytics dashboard

ACTIVITIES

NASA Space App Challenge 2025 – Jabalpur Edition,(Top 50) AI Founders Hackathon (CU Campus), ParanoX Hackathon 2.0, CodeSpark Hackathon – 2nd Runner Up, Kodekalesh Hackathon, NextGen Hackathon, The Teclasher Hackathon, CBIT Hackathon (Participate) Gen AI Academy 2.0 – PixelRiot Hackathon, Open Source Connect Global 2026 – Core Team Member.

ADDITIONAL

Technical Skills: Python, C++, JavaScript, React.js, Node.js, MySQL, Django, Git, GitHub, REST APIs

Languages: English, Hindi, Urdu

Certifications & Training: Google Gemini Certified Student, AWS ML Foundation, AWS Cloud Essentials, Infosys AI & ML & Cloud Technologies, Gen AI Academy 2.0, Cisco AIML Essentials, OSCI Contributor & OSC Global 2026 Core Team, Hacktoberfest 2025, Mastering Git & GitHub, GitHub Actions & Open Source Practices, Python–MySQL Project Training.
